

# SAFETY DATA SHEET

Revision date 27-Dec-2024

Revision Number 2

## Section 1: Identification

### Product identifier

**Product Name** EQAS Urinalysis Program

**Catalogue Number(s)** 12000810

### Other means of identification

### Recommended use of the chemical and restrictions on use

**Recommended use** Proficiency testing

**Uses advised against** No information available

### Details of the supplier of the safety data sheet

#### Supplier

Bio-Rad Laboratories Inc.  
1000 Alfred Nobel Drive  
Hercules, CA 94547  
USA

#### Manufacturer

Bio-Rad Laboratories Inc.  
9500 Jeronimo Road  
Irvine, California 92618  
USA

#### Importer

Bio-Rad Laboratories Pty Ltd  
189 Bush Road  
Albany Auckland  
New Zealand

**Technical Service** +64 9 415 2280 or 0508 805 500  
sales.nz@bio-rad.com

### Emergency telephone number

**24 Hour Emergency Phone Number** CHEMTREC New Zealand: 64-98010034

## Section 2: Hazard identification

### GHS Classification

|                                 |            |
|---------------------------------|------------|
| <b>Skin sensitisation</b>       | Category 1 |
| <b>Chronic aquatic toxicity</b> | Category 3 |

### Label elements

#### **Signal word**

Warning

#### **Hazard statements**

May cause an allergic skin reaction  
Harmful to aquatic life with long lasting effects

#### **Precautionary Statements - Prevention**

Avoid release to the environment

Wear protective gloves/clothing and eye/face protection

**Skin**

IF ON SKIN: Wash with plenty of water and soap

If skin irritation or rash occurs: Get medical advice/attention

**Precautionary Statements - Disposal**

Dispose of contents/container in accordance with local, regional, national, and international regulations as applicable

**Other hazards which do not result in classification**

Contains animal source material. (Pig). (Cattle). Contains components derived from human urine.

Contains human source material and / or potentially infectious components

**Section 3: Composition/information on ingredients**

| Chemical name                                                                    | CAS No.    | Weight-%     |
|----------------------------------------------------------------------------------|------------|--------------|
| Acetone                                                                          | 67-64-1    | 0.3 - 0.99   |
| 5-Chloro-2-methyl-3(2H)-isothiazolone, mixture with 2-methyl-3(2H)-isothiazolone | 55965-84-9 | 0.001 - 0.01 |

|                           |             |         |
|---------------------------|-------------|---------|
| Non-hazardous ingredients | Proprietary | Balance |
|---------------------------|-------------|---------|

**Section 4: First-aid measures****Description of first aid measures**

|                       |                                                                                                                                                                                                                                                                                                      |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General advice</b> | Show this safety data sheet to the doctor in attendance. Contains components derived from human urine.                                                                                                                                                                                               |
| <b>Inhalation</b>     | Remove to fresh air.                                                                                                                                                                                                                                                                                 |
| <b>Eye contact</b>    | Contains human source material and / or potentially infectious components. Rinse thoroughly with plenty of water for at least 15 minutes, lifting lower and upper eyelids. Consult a doctor. Call a doctor. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. |
| <b>Skin contact</b>   | Wash with soap and water. May cause an allergic skin reaction. In the case of skin irritation or allergic reactions see a doctor.                                                                                                                                                                    |
| <b>Ingestion</b>      | Contains human source material and / or potentially infectious components. Call a doctor.                                                                                                                                                                                                            |

**Most important symptoms and effects, both acute and delayed**

|                            |                           |
|----------------------------|---------------------------|
| <b>Symptoms</b>            | Itching. Rashes. Hives.   |
| <b>Effects of Exposure</b> | No information available. |

**Indication of any immediate medical attention and special treatment needed**

|                        |                                                                                                                                                   |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Note to doctors</b> | May cause sensitisation in susceptible persons. Treat symptomatically. Contains human source material and / or potentially infectious components. |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|

**Section 5: Fire-fighting measures****Suitable Extinguishing Media**

**Suitable Extinguishing Media** Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

**Large Fire** CAUTION: Use of water spray when fighting fire may be inefficient.

**Unsuitable extinguishing media** Do not scatter spilled material with high pressure water streams.

#### Specific hazards arising from the chemical

**Specific hazards arising from the chemical** Product is or contains a sensitiser. May cause sensitisation by skin contact.

#### Special protective actions for fire-fighters

**Special protective equipment and precautions for fire-fighters** Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear.

### **Section 6: Accidental release measures**

#### Personal precautions, protective equipment and emergency procedures

**Personal precautions** Avoid contact with skin, eyes or clothing. Ensure adequate ventilation. Use personal protective equipment as required. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

**For emergency responders** Use personal protection recommended in Section 8.

#### Environmental precautions

**Environmental precautions** See Section 12 for additional Ecological Information.

#### Methods and material for containment and cleaning up

**Methods for containment** Do not allow into any sewer, on the ground or into any body of water.

**Methods for cleaning up** Use: Disinfectant. Clean contaminated surface thoroughly.

#### Precautions to prevent secondary hazards

**Prevention of secondary hazards** Clean contaminated objects and areas thoroughly observing environmental regulations.

### **Section 7: Handling and storage**

#### Precautions for safe handling

**Advice on safe handling** Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Ensure adequate ventilation. In case of insufficient ventilation, wear suitable respiratory equipment. Do not eat, drink or smoke when using this product. Take off contaminated clothing and wash it before reuse.

**General hygiene considerations** Follow universal and standard precautions for handling potentially infectious materials.

#### Conditions for safe storage, including any incompatibilities

**Storage Conditions** Keep containers tightly closed in a dry, cool and well-ventilated place. Store according to product and label instructions.

**Incompatible materials** None known based on information supplied.

## Section 8: Exposure controls/personal protection

### Control parameters

#### Exposure Limits

| Chemical name      | New Zealand                                                                                   | Australia                                                                                     | ACGIH TLV                     | United Kingdom                                                                                |
|--------------------|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|-------------------------------|-----------------------------------------------------------------------------------------------|
| Acetone<br>67-64-1 | TWA: 500 ppm<br>TWA: 1185 mg/m <sup>3</sup><br>STEL: 1000 ppm<br>STEL: 2375 mg/m <sup>3</sup> | TWA: 500 ppm<br>TWA: 1185 mg/m <sup>3</sup><br>STEL: 1000 ppm<br>STEL: 2375 mg/m <sup>3</sup> | TWA: 250 ppm<br>STEL: 500 ppm | TWA: 500 ppm<br>TWA: 1210 mg/m <sup>3</sup><br>STEL: 1500 ppm<br>STEL: 3620 mg/m <sup>3</sup> |

#### Biological occupational exposure limits

| Chemical name      | New Zealand                              | ACGIH                                    |
|--------------------|------------------------------------------|------------------------------------------|
| Acetone<br>67-64-1 | 50 mg/L - urine (Acetone) - end of shift | 25 mg/L - urine (Acetone) - end of shift |

### Appropriate engineering controls

**Engineering controls** Showers  
Eyewash stations  
Ventilation systems.

### Individual protection measures, such as personal protective equipment

**Eyeface protection** Wear safety glasses with side shields (or goggles).

**Hand protection** Wear suitable gloves.

**Skin and body protection** Wear suitable protective clothing.

**Respiratory protection** No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.

**Environmental exposure controls** No information available.

## Section 9: Physical and chemical properties

### Information on basic physical and chemical properties

**Physical state** Liquid

**Appearance** Clear

**Colour** yellow-orange

**Odour** Odourless.

**Odour threshold** No information available

| <u>Property</u>                         | <u>Values</u>     | <u>Remarks • Method</u> |
|-----------------------------------------|-------------------|-------------------------|
| pH                                      | 5-9               | None known              |
| Melting point / freezing point          | No data available | None known              |
| Initial boiling point and boiling range | 100 °C            | None known              |
| Flash point                             | No data available | None known              |
| Evaporation rate                        | No data available | None known              |
| Flammability                            | No data available | None known              |
| Flammability Limit in Air               |                   | None known              |

|                                        |                           |            |
|----------------------------------------|---------------------------|------------|
| Upper flammability or explosive limits | No data available         |            |
| Lower flammability or explosive limits | No data available         |            |
| Vapour pressure                        | No data available         | None known |
| Relative vapour density                | No data available         | None known |
| Relative density                       | No data available         | None known |
| Water solubility                       | Miscible in water         |            |
| Solubility(ies)                        | No data available         | None known |
| Partition coefficient                  | No data available         | None known |
| Autoignition temperature               | No data available         | None known |
| Decomposition temperature              |                           | None known |
| Kinematic viscosity                    | No data available         | None known |
| Dynamic viscosity                      | No data available         | None known |
| Explosive properties                   | No information available. |            |
| Oxidising properties                   | No information available. |            |
| <b><u>Other information</u></b>        |                           |            |
| Softening point                        | No information available  |            |
| Molecular weight                       | No information available  |            |
| VOC content                            | No information available  |            |
| Liquid Density                         | No information available  |            |
| Bulk density                           | No information available  |            |
| Particle characteristics               | No information available  |            |

## Section 10: Stability and reactivity

### Reactivity

Reactivity No information available.

### Chemical stability

Stability Stable under normal conditions.

### Explosion data

Sensitivity to mechanical impact None.

Sensitivity to static discharge None.

### Possibility of hazardous reactions

Possibility of hazardous reactions None under normal processing.

### Conditions to avoid

Conditions to avoid None known based on information supplied.

### Incompatible materials

Incompatible materials None known based on information supplied.

### Hazardous decomposition products

Hazardous decomposition products None known based on information supplied.

## Section 11: Toxicological information

### Acute toxicity

**Information on likely routes of exposure****Product Information**

|                     |                                                                                                                                                                                                                            |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Inhalation</b>   | Specific test data for the substance or mixture is not available.                                                                                                                                                          |
| <b>Eye contact</b>  | Specific test data for the substance or mixture is not available.                                                                                                                                                          |
| <b>Skin contact</b> | May cause sensitisation by skin contact. Specific test data for the substance or mixture is not available. Repeated or prolonged skin contact may cause allergic reactions with susceptible persons (based on components). |
| <b>Ingestion</b>    | Specific test data for the substance or mixture is not available.                                                                                                                                                          |

**Symptoms** Itching. Rashes. Hives.

**Acute toxicity**

.

**Numerical measures of toxicity**

The following values are calculated based on chapter 3.1 of the GHS document

ATEmix (oral) 182,443.30 mg/kg

**Component Information**

| Chemical name                                                                    | Oral LD50            | Dermal LD50              | Inhalation LC50                       |
|----------------------------------------------------------------------------------|----------------------|--------------------------|---------------------------------------|
| Acetone                                                                          | = 5800 mg/kg ( Rat ) | > 15700 mg/kg ( Rabbit ) | = 50100 mg/m <sup>3</sup> ( Rat ) 8 h |
| 5-Chloro-2-methyl-3(2H)-isothiazolone, mixture with 2-methyl-3(2H)-isothiazolone | = 53 mg/kg ( Rat )   | = 87.12 mg/kg ( Rabbit ) | -                                     |

**Delayed and immediate effects as well as chronic effects from short and long-term exposure**

|                                          |                                                                                            |
|------------------------------------------|--------------------------------------------------------------------------------------------|
| <b>Skin corrosion/irritation</b>         | No information available.                                                                  |
| <b>Serious eye damage/eye irritation</b> | No information available.                                                                  |
| <b>Respiratory or skin sensitisation</b> | May cause an allergic skin reaction.                                                       |
| <b>Germ cell mutagenicity</b>            | No information available.                                                                  |
| <b>Carcinogenicity</b>                   | No information available.                                                                  |
| <b>Reproductive toxicity</b>             | No information available.                                                                  |
| <b>STOT - single exposure</b>            | No information available.                                                                  |
| <b>STOT - repeated exposure</b>          | No information available.                                                                  |
| <b>Aspiration hazard</b>                 | No information available.                                                                  |
| <b>Data used to identify the health</b>  | Refer to Section 16 for Key literature references and sources for data used to compile the |

effects

SDS.

## Section 12: Ecological information

### Ecotoxicity

#### Aquatic ecotoxicity

Harmful to aquatic life with long lasting effects.

| Chemical name | Algae/aquatic plants | Fish                                                                                                                                               | Crustacea                                                                                    |
|---------------|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| Acetone       | -                    | LC50: 4.74 - 6.33mL/L (96h, Oncorhynchus mykiss)<br>LC50: 6210 - 8120mg/L (96h, Pimephales promelas)<br>LC50: =8300mg/L (96h, Lepomis macrochirus) | EC50: 10294 - 17704mg/L (48h, Daphnia magna)<br>EC50: 12600 - 12700mg/L (48h, Daphnia magna) |

#### Terrestrial ecotoxicity

| Chemical name | Earthworm                                                                               | Avian                                                                                                                                       | Honeybees |
|---------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Acetone       | Acute Toxicity: LC50 200 - 1000 µg/cm <sup>2</sup> (Eisenia foetida, 48 h filter paper) | Dietary Toxicity: LC50 > 40000 ppm (Phasianus colchicus, 5 Days)<br>Dietary Toxicity: LC50 > 40000 ppm (Coturnix coturnix japonica, 5 Days) | -         |

#### Persistence and degradability

No information available.

### Bioaccumulative potential

#### Bioaccumulation

##### Component Information

| Chemical name                                                                    | Partition coefficient |
|----------------------------------------------------------------------------------|-----------------------|
| Acetone                                                                          | -0.24                 |
| 5-Chloro-2-methyl-3(2H)-isothiazolone, mixture with 2-methyl-3(2H)-isothiazolone | 0.7                   |

### Mobility in soil

#### Mobility

No information available.

### Other adverse effects

No information available.

## Section 13: Disposal considerations

### Disposal methods

#### Waste from residues/unused products

Dispose of product in packaging in a way that is consistent with the EPA Consolidation 30 April 2021 of the Hazardous Substances (Disposal) Notice 2017 and the Act.  
Treat the substance using a method that changes the characteristics or composition of the substance so that the substance is no longer a hazardous substance; or export the substance from New Zealand as waste.

Substances which are hazardous to human health or corrosive to metals – may be discharged into the environment if a tolerable exposure limit has been set for the substance (or a component of that substance); and the discharge does not, after reasonable mixing, result in the concentration of the substance in an environmental medium exceeding the tolerable exposure limit. If there is no tolerable exposure limit for the substance, then it may only be discharged into the environment if the substance is very rapidly converted to substances that are not hazardous substances.

Environmentally hazardous substances – if the substance, or if it contains a component that is hazardous to the aquatic environment or bioaccumulative and not rapidly degradable, then any component that is bioaccumulative and not rapidly degradable must be removed. The product may only be discharged into the environment if an environmental exposure limit has been set for the substance (or a component of the substance); and the discharge does not, after reasonable mixing, result in the concentration of the substance in an environmental medium exceeding the environmental exposure limit.

Dispose of in accordance with local regulations.

Dispose of waste in accordance with environmental legislation.

#### Contaminated packaging

For packages that have been in direct contact with hazardous substances, the person must ensure that the package is rendered incapable of containing any substance. It must be disposed of in a manner that is consistent with the requirements for disposal of the substance that it contained, taking into account the material the package is manufactured from.

Packages may only be reused or recycled if:

- the substance has a physical hazard other than corrosive to metal, and has been treated to remove any residual contents of the hazardous substance;
- or for substances that have a health or environmental hazard, or corrosive to metal, the contents of the residue in the package are below the threshold for the substance to be classified as hazardous in the Hazardous Substances (Hazard Classification) Notice 2020.

### Section 14: Transport information

#### IATA

Not regulated

#### IMDG

Not regulated

#### Transport in bulk according to Annex II of MARPOL and the IBC Code

No information available

#### Special precautions for user

Please refer to the applicable dangerous goods regulations for additional information

### Section 15: Regulatory information

#### Safety, health and environmental regulations/legislation specific for the substance or mixture

#### National regulations

EPA New Zealand HSNO approval code or group standard

To be determined

#### National regulations

There are no applicable tolerable exposure limits or environmental exposure limits according to the EPA Controls for Hazardous Substances

#### Certified handlers, tracking and controlled substance license requirements

Certified handlers are required for some substances. This includes substances requiring a controlled substance license, and most explosives, vertebrates toxic agents, and certain fumigants. Acutely toxic substances which are a Category 1 or 2, such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information

Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information

Controlled substance licenses are required to possess certain explosives, vertebrate toxic agents and fumigants. See Part 7 of the Health and Safety at Work Regulation 2017 for more information

### International Regulations

**The Montreal Protocol on Substances that Deplete the Ozone Layer** Not applicable

**The Stockholm Convention on Persistent Organic Pollutants** Not applicable

**The Rotterdam Convention** Not applicable
