

# SAFETY DATA SHEET

Revision date 12-Dec-2024

Revision Number 3.1

## Section 1: Identification

### Product identifier

**Product Name** Bio-Lyte 3-10 Buffer, 100x, 20% Bio-Lyte ampholytes

**Catalogue Number(s)** 1632094

### Other means of identification

### Recommended use of the chemical and restrictions on use

**Recommended use** Laboratory chemicals

**Uses advised against** No information available

### Details of the supplier of the safety data sheet

#### Supplier

Bio-Rad Laboratories Inc.  
1000 Alfred Nobel Drive  
Hercules, CA 94547  
USA

#### Manufacturer

Bio-Rad Laboratories, Life Science Group  
2000 Alfred Nobel Drive  
Hercules, California 94547  
USA

#### Importer

Bio-Rad Laboratories Pty Ltd  
189 Bush Road  
Albany Auckland  
New Zealand

**Technical Service** +64 9 415 2280 or 0508 805 500  
sales.nz@bio-rad.com

### Emergency telephone number

**24 Hour Emergency Phone Number** CHEMTREC New Zealand: 64-98010034

## Section 2: Hazard identification

### GHS Classification

|                                 |            |
|---------------------------------|------------|
| <b>Skin sensitisation</b>       | Category 1 |
| <b>Chronic aquatic toxicity</b> | Category 3 |

### Label elements

**Signal word**  
Warning

### **Hazard statements**

May cause an allergic skin reaction  
Harmful to aquatic life with long lasting effects

### **Precautionary Statements - Prevention**

Avoid release to the environment

Wear protective gloves

#### Skin

IF ON SKIN: Wash with plenty of water and soap

If skin irritation or rash occurs: Get medical advice/attention

#### Precautionary Statements - Disposal

Dispose of contents/container in accordance with local, regional, national, and international regulations as applicable

#### Other hazards which do not result in classification

No information available.

### Section 3: Composition/information on ingredients

| Chemical name                             | CAS No.     | Weight-%     |
|-------------------------------------------|-------------|--------------|
| 1,2,3-Propanetriol                        | 56-81-5     | 1 - 2.5      |
| 3,6,9,12-Tetrazaatetradecane-1,14-diamine | 4067-16-7   | 0.1 - 0.29   |
| Ethyl acrylate                            | 140-88-5    | 0.01 - 0.099 |
| Sodium azide                              | 26628-22-8  | 0.001 - 0.01 |
| Non-hazardous ingredients                 | Proprietary | Balance      |

### Section 4: First-aid measures

#### Description of first aid measures

|                |                                                                                                                                   |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------|
| General advice | Show this safety data sheet to the doctor in attendance.                                                                          |
| Inhalation     | Remove to fresh air.                                                                                                              |
| Eye contact    | Rinse thoroughly with plenty of water for at least 15 minutes, lifting lower and upper eyelids. Consult a doctor.                 |
| Skin contact   | Wash with soap and water. May cause an allergic skin reaction. In the case of skin irritation or allergic reactions see a doctor. |
| Ingestion      | Rinse mouth.                                                                                                                      |

#### Most important symptoms and effects, both acute and delayed

|                     |                                                                             |
|---------------------|-----------------------------------------------------------------------------|
| Symptoms            | Itching. Rashes. Hives. Prolonged contact may cause redness and irritation. |
| Effects of Exposure | No information available.                                                   |

#### Indication of any immediate medical attention and special treatment needed

|                 |                                                                        |
|-----------------|------------------------------------------------------------------------|
| Note to doctors | May cause sensitisation in susceptible persons. Treat symptomatically. |
|-----------------|------------------------------------------------------------------------|

### Section 5: Fire-fighting measures

#### Suitable Extinguishing Media

|                              |                                                                                                         |
|------------------------------|---------------------------------------------------------------------------------------------------------|
| Suitable Extinguishing Media | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. |
|------------------------------|---------------------------------------------------------------------------------------------------------|

**Large Fire**

CAUTION: Use of water spray when fighting fire may be inefficient.

**Unsuitable extinguishing media**

Do not scatter spilled material with high pressure water streams.

**Specific hazards arising from the chemical**

**Specific hazards arising from the chemical**

Product is or contains a sensitiser. May cause sensitisation by skin contact.

**Special protective actions for fire-fighters**

**Special protective equipment and precautions for fire-fighters**

Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear.

## Section 6: Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

**Personal precautions**

Avoid contact with skin, eyes or clothing. Ensure adequate ventilation. Use personal protective equipment as required. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

**For emergency responders**

Use personal protection recommended in Section 8.

**Environmental precautions**

**Environmental precautions**

See Section 12 for additional Ecological Information.

**Methods and material for containment and cleaning up**

**Methods for containment**

Prevent further leakage or spillage if safe to do so.

**Methods for cleaning up**

Pick up and transfer to properly labelled containers.

**Precautions to prevent secondary hazards**

**Prevention of secondary hazards**

Clean contaminated objects and areas thoroughly observing environmental regulations.

## Section 7: Handling and storage

**Precautions for safe handling**

**Advice on safe handling**

Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Ensure adequate ventilation. In case of insufficient ventilation, wear suitable respiratory equipment. Do not eat, drink or smoke when using this product. Take off contaminated clothing and wash it before reuse.

**Conditions for safe storage, including any incompatibilities**

**Storage Conditions**

Keep containers tightly closed in a dry, cool and well-ventilated place. Store according to product and label instructions.

**Incompatible materials**

Metals.

## Section 8: Exposure controls/personal protection

### Control parameters

#### Exposure Limits

| Chemical name                 | New Zealand                                                                                     | Australia                                     | ACGIH TLV                                                                                    | United Kingdom                                                                        |

#### Biological occupational exposure limits

This product, as supplied, does not contain any hazardous materials with biological limits established by the region specific regulatory bodies.

### Appropriate engineering controls

#### Engineering controls

Showers  
Eyewash stations  
Ventilation systems.

### Individual protection measures, such as personal protective equipment

#### Eye/face protection

Wear safety glasses with side shields (or goggles).

#### Hand protection

Wear suitable gloves.

#### Skin and body protection

Wear suitable protective clothing.

#### Respiratory protection

No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.

#### Environmental exposure controls

No information available.

## Section 9: Physical and chemical properties

### Information on basic physical and chemical properties

|                 |                          |
|-----------------|--------------------------|
| Physical state  | Liquid                   |
| Appearance      | aqueous solution         |
| Colour          | clear                    |
| Odour           | Odourless.               |
| Odour threshold | No information available |

#### Property

#### Values

#### Remarks • Method

|                                         |                   |            |
|-----------------------------------------|-------------------|------------|
| pH                                      | No data available | None known |
| Melting point / freezing point          | No data available | None known |
| Initial boiling point and boiling range | 100 °C            |            |
| Flash point                             | No data available | None known |
| Evaporation rate                        | No data available | None known |

|                                        |                           |            |
|----------------------------------------|---------------------------|------------|
| Flammability                           | No data available         | None known |
| Flammability Limit in Air              |                           | None known |
| Upper flammability or explosive limits | No data available         |            |
| Lower flammability or explosive limits | No data available         |            |
| Vapour pressure                        | No data available         | None known |
| Relative vapour density                | No data available         | None known |
| Relative density                       | No data available         | None known |
| Water solubility                       | Miscible in water         |            |
| Solubility(ies)                        | No data available         | None known |
| Partition coefficient                  | No data available         | None known |
| Autoignition temperature               | No data available         | None known |
| Decomposition temperature              |                           | None known |
| Kinematic viscosity                    | No data available         | None known |
| Dynamic viscosity                      | No data available         | None known |
| Explosive properties                   | No information available. |            |
| Oxidising properties                   | No information available. |            |
| <b>Other information</b>               |                           |            |
| Softening point                        | No information available  |            |
| Molecular weight                       | No information available  |            |
| VOC content                            | No information available  |            |
| Liquid Density                         | No information available  |            |
| Bulk density                           | No information available  |            |
| Particle characteristics               | No information available  |            |

## Section 10: Stability and reactivity

### Reactivity

Reactivity No information available.

### Chemical stability

Stability Stable under normal conditions.

### Explosion data

Sensitivity to mechanical impact None.

Sensitivity to static discharge None.

### Possibility of hazardous reactions

Possibility of hazardous reactions Avoid contact with metals. This product contains Sodium azide. Sodium azide can react with Copper, Brass, Lead, and solder in piping systems to form explosive compounds and toxic gases.

### Conditions to avoid

Conditions to avoid None known based on information supplied.

### Incompatible materials

Incompatible materials Metals.

### Hazardous decomposition products

Hazardous decomposition products None known based on information supplied.

**Section 11: Toxicological information****Acute toxicity****Information on likely routes of exposure****Product Information**

|                     |                                                                                                                                                                                                                                                         |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Inhalation</b>   | Specific test data for the substance or mixture is not available.                                                                                                                                                                                       |
| <b>Eye contact</b>  | Specific test data for the substance or mixture is not available.                                                                                                                                                                                       |
| <b>Skin contact</b> | May cause sensitisation by skin contact. Specific test data for the substance or mixture is not available. Repeated or prolonged skin contact may cause allergic reactions with susceptible persons (based on components). Causes mild skin irritation. |
| <b>Ingestion</b>    | Specific test data for the substance or mixture is not available.                                                                                                                                                                                       |
| <b>Symptoms</b>     | Itching. Rashes. Hives. Prolonged contact may cause redness and irritation.                                                                                                                                                                             |

| Reproductive toxicity                    | No information available.                                                                       |
| STOT - single exposure                   | No information available.                                                                       |
| STOT - repeated exposure                 | No information available.                                                                       |
| Aspiration hazard                        | No information available.                                                                       |
| Data used to identify the health effects | Refer to Section 16 for Key literature references and sources for data used to compile the SDS. |

## Section 12: Ecological information

### Ecotoxicity

**Aquatic ecotoxicity** Harmful to aquatic life with long lasting effects.

| Chemical name      | Algae/aquatic plants                         | Fish                                                                                                                                 | Crustacea                           |
|--------------------|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| 1,2,3-Propanetriol | -                                            | LC50: 51 - 57mL/L (96h, Oncorhynchus mykiss)                                                                                         | -                                   |
| Ethyl acrylate     | EC50: =48mg/L (72h, Desmodismus subspicatus) | LC50: =4.6mg/L (96h, Oncorhynchus mykiss)<br>LC50: 2.31 - 2.7mg/L (96h, Pimephales promelas)                                         | EC50: =7.9mg/L (48h, Daphnia magna) |
| Sodium azide       | -                                            | LC50: =0.8mg/L (96h, Oncorhynchus mykiss)<br>LC50: =0.7mg/L (96h, Lepomis macrochirus)<br>LC50: =5.46mg/L (96h, Pimephales promelas) | -                                   |

**Terrestrial ecotoxicity** There is no data for this product.

**Persistence and degradability** No information available.

### Bioaccumulative potential

#### Bioaccumulation

##### Component Information

| Chemical name      | Partition coefficient |
|--------------------|-----------------------|
| 1,2,3-Propanetriol | -1.75                 |
| Ethyl acrylate     | 1.18                  |

### Mobility in soil

**Mobility** No information available.

#### Other adverse effects

No information available.

### Section 13: Disposal considerations

#### Disposal methods

##### **Waste from residues/unused products**

Dispose of product in packaging in a way that is consistent with the EPA Consolidation 30 April 2021 of the Hazardous Substances (Disposal) Notice 2017 and the Act.

Treat the substance using a method that changes the characteristics or composition of the substance so that the substance is no longer a hazardous substance; or export the substance from New Zealand as waste.

Substances which are hazardous to human health or corrosive to metals – may be discharged into the environment if a tolerable exposure limit has been set for the substance (or a component of that substance); and the discharge does not, after reasonable mixing, result in the concentration of the substance in an environmental medium exceeding the tolerable exposure limit. If there is no tolerable exposure limit for the substance, then it may only be discharged into the environment if the substance is very rapidly converted to substances that are not hazardous substances.

Environmentally hazardous substances – if the substance, or if it contains a component that is hazardous to the aquatic environment or bioaccumulative and not rapidly degradable, then any component that is bioaccumulative and not rapidly degradable must be removed.

The product may only be discharged into the environment if an environmental exposure limit has been set for the substance (or a component of the substance); and the discharge does not, after reasonable mixing, result in the concentration of the substance in an environmental medium exceeding the environmental exposure limit.

Dispose of in accordance with local regulations.

Dispose of waste in accordance with environmental legislation.

Flush pipes with water frequently if discarding solutions containing Sodium azide into metal piping systems.

##### **Contaminated packaging**

For packages that have been in direct contact with hazardous substances, the person must ensure that the package is rendered incapable of containing any substance. It must be disposed of in a manner that is consistent with the requirements for disposal of the substance that it contained, taking into account the material the package is manufactured from.

Packages may only be reused or recycled if:

- the substance has a physical hazard other than corrosive to metal, and has been treated to remove any residual contents of the hazardous substance;
- or for substances that have a health or environmental hazard, or corrosive to metal, the contents of the residue in the package are below the threshold for the substance to be classified as hazardous in the Hazardous Substances (Hazard Classification) Notice 2020.

### Section 14: Transport information

#### IATA

Not regulated

#### IMDG

Not regulated

#### **Transport in bulk according to Annex II of MARPOL and the IBC Code**

No information available

#### **Special precautions for user**

Please refer to the applicable dangerous goods regulations for additional information

### Section 15: Regulatory information

**Safety, health and environmental regulations/legislation specific for the substance or mixture**

**EPA New Zealand HSNO approval code or group standard** To be determined

**National regulations** There are no applicable tolerable exposure limits or environmental exposure limits according to the EPA Controls for Hazardous Substances

**Certified handlers, tracking and controlled substance license requirements** Certified handlers are required for some substances. This includes substances requiring a controlled substance license, and most explosives, vertebrates toxic agents, and certain fumigants. Acutely toxic substances which are a Category 1 or 2, such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information  
Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information  
Controlled substance licenses are required to possess certain explosives, vertebrate toxic agents and fumigants. See Part 7 of the Health and Safety at Work Regulation 2017 for more information

**International Regulations**

**The Montreal Protocol on Substances that Deplete the Ozone Layer** Not applicable

**The Stockholm Convention on Persistent Organic Pollutants** Not applicable

**The Rotterdam Convention** Not applicable

**International Inventories**
